## Introduction

Writing always requires that you should create content with appropriate points clarity and detailed content. Writing must be clear, comprehensive, and crafted to avoid confusing its audience. A good piece of writing saves time and energy for both writers and readers. Writing skills are one of the productive skills in the language learning process. Generally, the writing process involves three steps Prewriting, Writing, and Rewriting. In the process of prewriting, we consider the purpose of our writing, and the audience, and collect the data. While crafting the content if you avoid grammatical mistakes by proofreading then your piece of content would become most effective and professional too. As a writer, you should systematically organize your thoughts to help your reader better understand that they can connect with the original content that you provided. While writing you should consider the audience's recognition as well because it plays a vital role. When you maintain the tone of your content as properly that will appeal to the reader's needs. Meanwhile, you connect with the audience or reader through a written communication channel. The writing process is dynamic and it is called crafting art too. Good content is a part of a written document.
